

# Manish Kala

📍 Haryana, India    ✉ manishkl543@gmail.com    🔗 thejat.in    in manish-kala    🎧 The-Jat

## Professional Summary

---

Skilled Software Engineer with expertise in system programming, full-stack development, embedded systems, and competitive problem-solving. Proficient in C, C++, JavaScript, Angular, and low-level software design. Strong in algorithms, debugging, and collaborative development in fast-paced environments.

## Work Experience

---

### Software Engineer

Noida, India

Virtual Engineering Services PVT. LTD.

July 2022 – Present

- Architected a scalable solution in C/C++ for converting 3D objects to 2D PDF drawings, significantly improving system reliability and performance.
- Built internal command-line utilities in C++ to automate repetitive development tasks, reducing manual effort by 40%.
- Utilized advanced optimization techniques in HTML, CSS, JavaScript, and Angular to reduce load times by 30%, facilitating the efficient display of complex, heavy models within web applications.

### Software Engineer

New Delhi, India

Extrieve Technologies

Aug 2021 – July 2022

- Refactored legacy C/C++ codebase to modern C++, enhancing maintainability and reducing bugs by leveraging OOP principles and STL.
- Designed and developed a document image scanning system using C++ that automated the digitization process, cutting the manual processing time by 50% and boosting throughput by 30%.

## Education

---

### Kurukshetra University

Sept 2016 – Dec 2020

Bachelor of Technology in Computer Science

- **Coursework:** Data Structures and Algorithms, Operating Systems, Database Management Systems, Computer Networks, Software Engineering, Compiler Design, Computer Architecture, Theory of Computation, Artificial Intelligence, Machine Learning

## Skills

---

### Technical Skills:

**Programming Languages:** C, C++, C#, Java, JavaScript, x86 Assembly

**Web Development:** HTML, CSS, Angular, Laravel, Node.js

**Graphics and 3D:** OpenGL, Three.js

**Networking:** POSIX sockets, REST API

**Frameworks and Platforms:** UWP, Win32, WinForms

**Operating System:** Linux, Windows

**Version Control:** Git

**Soft Skills:** Collaborative Teamwork, Problem solving, Adaptability

## Projects

---

### Content Management System (CMS)

[www.thejat.in](http://www.thejat.in) 

- Developed a robust CMS for managing blogs, courses, and coding challenges, enhancing content delivery and user engagement.
- Developed a scalable back-end using Laravel with RESTful API integration, ensuring smooth data flow and

system reliability.

- Designed an intuitive and responsive admin dashboard that streamlined content creation and management.
- Tool Stack: Laravel

### **Custom Operating System along with Boot Loader**

[TheTaaJ on Github](#) 

- Engineered and implemented a 32-bit x86 operating system kernel from scratch.
- Utilized the framebuffer for graphical output, supporting text rendering, and basic 2D graphics.
- Integrated an ISO 9660 boot system and advanced memory management features.
- Technologies used: C, C++, x86 Assembly, Make, QEMU, VirtualBox.

### **Lightweight HTTP Server**

[CppWeb on Github](#) 

- Developed a fast and minimal HTTP server using C++ socket programming without external libraries.
- Handled HTTP/1.0 and HTTP/1.1 GET requests with proper request parsing and response generation.
- Served static content (HTML, CSS, JS, images) directly from the filesystem.
- Implemented basic HTTP response codes (200 OK, 404 Not Found, 400 Bad Request, etc.).
- Tool Stack: C/C++, POSIX sockets, Make build system.

### **Custom Build System**

[TheBuilder](#) 

- Developed 'TheBuilder', a custom build system tailored for the 'TheTaaJ' operating system, utilizing GNU Make and C++ to streamline and automate the compilation process.
- Tools Stack: C/C++.
